This application is before the examiner for consideration on the merits.

- I. Applicant's prior art submission filed on 14 April 2003 has been considered.
- II. The following is an examiner's statement of reasons for allowance: It is known in the art to use a liquid coolant to cool an operating fuel cell. Evidence can be seen in Mayer et al, Buchner et al and Kothmann as submitted. However, patentees fail to disclose, teach and suggest the steps of discontinuing a pump to allow a temperature to rise when a current density is less than 25% of a full power or 0.2 A/cm<sup>2</sup> to seek improving efficiency of fuel cell and eliminating a parasitic load of the pump as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

- III. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa V. Le whose telephone number is 571-272-1332. The examiner can normally be reached from 6:00 AM to 4:00 PM on Monday through Thursday and about the same time of most Friday.
